

SEGGER J-Link and Flasher fully support Nations Technologies' N32 series MCU

Monheim am Rhein, Germany – March 2nd, 2023

SEGGER announces that its [J-Link](#) debug probe, and its [Flasher](#) family of professional in-circuit programmers, now fully support the N32 series MCUs from Nations Technologies Inc.

“Having a complete, fully-supported, embedded software development and debugging platform, as well as fully-supported, reliable, mass production tools, are critical components for efficient development,” says XIAO Deyin, vice president of Nations Technologies Inc. “We are thrilled to reach a long-term partnership with SEGGER, enabling our customers to enjoy the quick and efficient user experience of the J-Link Prime service for silicon vendors. J-Link software v7.86 fully supports Nations N32G4xx, N32L4xx, N32WBxx, N32G03x, and other products, which will better serve our domestic and overseas customers.”

“We are very excited to partner with Nations, making the most of their high-performance industrial and automotive-grade MCUs,” says CHEN Guowei, Executive Director & General Manager of SEGGER China. “With J-Link Prime, SEGGER makes sure that J-Links and Flashers deliver the best performance possible for the debugging and flash programming of all N32 devices. We are looking forward to expanding our partnership with Nations in the years to come.”

SEGGER [J-Links](#) are the most widely used line of debug probes on the market, providing an unparalleled debug experience, using capabilities fine-tuned for software development and production.

SEGGER [Flashers](#) are fast, robust, reliable, and designed for ease-of-use in service environments, prototype programming, and for mass production.

Nations Technologies Inc., established in 2000, is focused on general MCU and security ICs. It is headquartered in Shenzhen with international branches in Japan, Singapore and USA.

N32 series MCUs have been applied in industrial control, motor drives, battery and energy management, smart meters, medical electronics, automotive electronics, security, biometrics, communication, sensors, machine automation, etc. and is widely recognized by customers.

About SEGGER

SEGGER Microcontroller GmbH has three decades of experience in Embedded Systems, producing cutting-edge [RTOS and Software Libraries](#), J-Link and J-Trace [debug and trace probes](#), a line of [Flasher In-System Programmers](#) and [software development tools](#).

SEGGER's all-in-one solution [emPower OS](#) provides an RTOS plus a complete spectrum of software libraries including communication, security, data compression and storage, user interface software and more. Using emPower OS gives developers a head start, benefiting from decades of experience in the industry.

SEGGER's professional embedded development software and tools are simple in design, optimized for embedded systems, and support the entire embedded system development process through affordable, high-quality, flexible and easy-to-use tools.

The company was founded by Rolf Segger in 1992, is privately held, and is growing steadily. SEGGER also has a U.S. office in the Boston area and branch operations in Silicon Valley, Shanghai and the UK, plus distributors on most continents, making SEGGER's full product range available worldwide.

Why SEGGER?

In short, SEGGER has a full set of tools for embedded systems, offers support through the entire development process, and has decades of experience as the Embedded Experts.

In addition, SEGGER software is not covered by an open-source or required-attribution license and can be integrated in any commercial or proprietary product, without the obligation to disclose the combined source.

Finally, SEGGER offers stability in an often volatile industry, making SEGGER a very reliable partner for long-term relationships.
