

## SEGGER J-Link GDB-Server: FREE

Hilden, Germany – September 15<sup>th</sup>, 2011 – SEGGER Microcontroller today announced the free availability of the J-Link GDB-Server. As the GNU-tool-chain gains ground in terms of performance and usability, GDB continues to grow in popularity. Per the numerous requests of this expanding community, SEGGER is now offering their professionally developed GDB-Server for free to all users of the SEGGER J-Link product line. The free GDB-server is now available for download as part of the J-Link Software and Documentation pack V4.35e.

“With the now free GDB-Server the GNU community has easier access to the fastest debug emulator in the market. For an unlimited debug experience we also offer Flash Breakpoints. This option is included in our non-commercial J-Link EDU, which is especially attractive to educational institutions”, says Dirk Akemann, Partnership Marketing Manager at SEGGER.

Full product specifications are available at: <http://www.segger.com/jlink.html>

The J-Link-Software is available at: [http://www.segger.com/download\\_jlink.html](http://www.segger.com/download_jlink.html)

### About SEGGER

**SEGGER Microcontroller** develops and distributes hardware and software development tools as well as software components for embedded systems. An "embedded system" is one in which a microprocessor and associated components are incorporated into a device helping to accomplish difficult and complex tasks in products such as cell phones, medical instruments, instrument clusters, measurement instruments, satellite radios, digital cameras etc.

SEGGER was founded in 1997, is privately held, has been profitable since its inception, and is growing steadily. Based in Hilden with distributors in all continents and a local office in Massachusetts, SEGGER offers its full product range worldwide.

SEGGER software products include: embOS (RTOS), emWin (GUI), emFile (File System), emUSB (USB host and device stack) and embOS/IP (TCP/IP stack). With the experience in programming efficiently on embedded systems, SEGGER created highly integrated, cost-effective programming and development tools, such as the Flasher (stand-alone flash programmer) and the industry leading J-Link/J-Trace emulator.

SEGGER's intention is to cut software development time for embedded applications by offering affordable, high quality, flexible and easy-to-use tools and software components allowing developers to focus on their applications. Find out more at <http://www.segger.com>
